## SIDDHI VINAYAK

We started our journey when the industry was reliant on unskilled labour with chisels and hammers. Now, after nearly 5 decades every process be in mining or processing is done with machines.

we are grateful to almighty, our ancestral hard-work and support of our stone organix family that we are also fully equipped with latest machinery. starting initially from the Indian market, slowly progressing towards the international market.

renewable energy(solar), Eco-friendly, Waste Slurry Management, modernized machinery, Skilled Staff and with superior work culture we started stone organix.
